ABSTRACT OF THE DISCLOSURE

A fluid bin assembly includes a bin having a floor with a side wall upstanding

therefrom. The floor and the side wall bound a chamber. The floor has an opening

extending therethrough that communicates with the chamber. A retention plate is

removably mounted to the floor of the bin so as to at least partially cover the opening

extending therethrough. The retention plate at least partially bounds a porthole that

openly communicates with the chamber of the bin.
